### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007 include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Do all hearing aid-compatible handsets that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

N/A

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: [http://ww2.docomousawireless.com/pdf/hearing\\_aid.pdf](http://ww2.docomousawireless.com/pdf/hearing_aid.pdf)

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: DOCOMO USA Wireless provides various tools to inform consumers about its product offerings that are hearing aid compatible. For example, the company's website offers complete information about its hearing aid compatible handsets, and all hearing aid compatible handsets are appropriately labeled. In addition, the company conducts periodic training to ensure that its representatives in its retail stores and call center, as well as its corporate sales staff, understand this subject matter and are able to effectively assist customers who use hearing aids.

### Methodology for Functionality Levels

Good: Devices in the "Good" category provide basic voice and messaging/text capabilities. They generally operate on fewer frequency bands than other offered devices. Although email and web browsing might be available, such data functions are limited in speed and usability. To the extent they have camera or video functionality, it typically is

low resolution. Displays are usually small and low resolution. Prices for Good devices are generally lower than other offered devices.

**Better:** Devices in the "Better" category are characterized by voice, messaging/text, and advanced data services, including email and web browsing services. They may be able to operate on more frequency bands than Good devices. The devices may include a full/QWERTY keyboard. They often include cameras with reasonable resolution and video functionality. Displays are usually larger with better resolution, and may have touch screen capability. They also may be WiFi and GPS enabled. Prices for Better devices are generally mid-range.

**Best:** Devices in the "Best" category are characterized by voice, messaging/text, and advanced data services, including email, web browsing and multimedia services. They typically can operate on more frequency bands than other offered devices. They devices include a full/QWERTY keyboard. They include cameras with high resolution and video functionality. Displays are larger with better resolution, and usually have touch screen capability. They include advanced operating systems and allow customers to download third-party applications. They also are WiFi and GPS enabled. Prices for Best devices are generally higher than other offered devices.
